Rocas de luz

KUARZO nos brinda la transparencia del cristal en combinación con colores vaporosos. El detalle se verá manipulado por la elección del adhesivo: ya sea uno de color similar o blanco para resaltar las características del vidrio o uno diferente para una vista versátil.

Rocks of Light

Transparent glass in combination with tenuous color tones bestows a particular delicacy to KUARZO. Detail will be affected by the choice of adhesive, whether it is of a similar color or white to emphasize the characteristics of the glass, or of a different color for a more versatile look.
